

A black and white portrait of Katherine Johnson, a Black woman with short, dark, curly hair, wearing glasses with decorative temples and a light-colored, textured jacket over a white collared shirt. The background is a solid dark gray. A dark gray rectangular box is overlaid on the lower right portion of the image, containing the text.

KATHERINE JOHNSON

BY: MASON, JACKSON, JAX, DHYAN, AND LUCAS

CONTRIBUTIONS /BACKGROUND

- Born in 1918 in West Virginia
- Joined Nasa in 1953
- Calculated spacecraft flight paths
- Helped launch astronauts into space
- Helped with first U.S. manned space flight(1961)
- A inspiration for women in STEM

UNDERREPRESENTATION

AS A BLACK WOMAN IN HER TIME SHE WAS
EXTREMELY UNDER VALUED.

CONTRIBUTIONS USED TODAY

- Orbital Mechanics
- Spacecraft trajectories
- Flight path calculations
- Aerospace navigation
- Used by NASA and SpaceX
- GPS navigation, Weather systems, and communication systems.

FUTURE OF TECHNOLOGY

- Future space flights based on her math
- Mars missions
- Deep space satellites

OVERALL FEEDBACK FROM SURVEY

A lot of people noticed:

- There was no home button
- The color scheme wasn't very good
- Some links didn't work
- There were a lot of typos and grammatical mistakes on the innovator page
- The layout of the information on the innovator page wasn't very intuitive

CHANGES

- We fixed broken links on the website
- We also changed the color scheme of the whole website using the Adobe color wheel
- We also added the missing home button
- We also corrected the typos and other mistakes on the innovator page
